

the culture collective

At The Culture Collective, we understand that culture is the heartbeat of a classroom, and a school. With over 25 years of experience in education and child development, our approach goes deeper than just a “program” but aims to develop the underpinning beliefs, values and pedagogies used to support educators in finding, and maintaining, a culture that empowers them and their students.

With our founders, Chey & Olivia, having backgrounds in education, counselling, and psychology, they bring extensive expertise to support educators in establishing a learning environment where every student, and educator, can flourish.
